FEMA Floodplains

FEMA Floodplain Map

Data Description:

A 100 Year Floodplain is the area adjoining a river or stream that has been or may be covered by a 100-year flood event. The term 100-year flood does not refer to a flood that will occur once every 100 years. A 100-year flood has a one percent chance of being equaled or exceeded in any given year. The 100 year floodplain corresponds with the Federal Emergency Management Agency (FEMA) zones A and AE. The 500 year event has a 0.2 percent chance of being equaled or exceeded in any given year.
